OPEN SOURCE CONTRIBUTIONS

MiniT2I: A Minimalist Baseline for Text-to-Image Generation

2026.6

<https://peppaking8.github.io/#/post/minit2i>

Joint work with Xianbang Wang, Yiyang Lu, Kangyang Zhou, Linrui Ma, and supervised by Kaiming He.

- Investigated the minimal compute and data regime for text-to-image generation under academia-scale constraints.
- Achieved competitive performance on standard T2I benchmarks against existing text-to-image systems which are substantially larger and more complex.
- Open-sourced the full codebase, model checkpoints, and training recipes to support reproducible

research.

EXPERIENCES

Undergraduate Research in Computer Vision

Supervised by Professor Kaiming He

Sep 2024 - Now

- Developed and optimized large-scale JAX training pipelines on TPU clusters for group.
- Conducted research on generative models, with a major focus on diffusion models and their variants.
- Built text-to-image and multimodal generation/understanding systems, with experiments focusing on pixel-space generation and representation learning.

AWARDS

Gold Medal

53rd International Physics Olympiad

2023.7

SKILLS

Tools: JAX/TPU; Agentic Coding

Languages: English (Fluent), Chinese (Native)
