Experience

Undergraduate Researcher Sep 2024 – Present
MIT, supervised by Professor Kaiming He

- Developed and optimized large-scale JAX training pipelines on TPU clusters for the research group.
- Conducted research on diffusion models and their variants; current work focuses on multi-agent systems.
- Built text-to-image and multimodal generation/understanding systems, with experiments focusing on pixel-space generation and representation learning.

Internship in Agentic Benchmarks Summer 2026
Abaka.ai

- Contributed to building benchmarks for computer-use agents and cybersecurity agents.
- Researched multi-agent systems to improve team productivity and collaboration.

Internship in Multimodal Generation Summer 2025
ByteDance Seed

- Contributed to building diffusion-based joint text-image generation systems.

Awards

Gold Medal, 53rd International Physics Olympiad (IPhO) Jul 2023

Skills

Tools: JAX, TPU training workflows
Languages: English (Fluent), Chinese (Native)
